

Step 8, 2 stars Varied Fluency	Step 8, 2 stars Reasoning
<p>5a. $3 \frac{8}{20}$</p> <p>6a. True</p> <p>7a. Box 1</p> <p>8a. $6 \frac{37}{6}, 6 \frac{8}{24}, 6 \frac{1}{2}, \frac{40}{6}, 6 \frac{10}{12}$</p>	<p>4a. Various answers; for example:</p> $\begin{array}{ c } \hline 32 \\ \hline 6 \\ \hline \end{array} > \begin{array}{ c } \hline 80 \\ \hline 30 \\ \hline \end{array}$ <p>5a. $\frac{84}{21}$ is the mistake because it is equivalent to 4 which is less than $4 \frac{1}{7}$.</p> <p>6a. Archie is correct because the numbers are ordered from smallest ($6 \frac{2}{5}$) to largest ($7 \frac{2}{5}$) and his number ($6 \frac{4}{5}$) comes in between the two numbers.</p>
Step 8, 3 stars Varied Fluency	Step 8, 3 stars Reasoning
<p>9a. $9 \frac{4}{6}$</p> <p>10a. True</p> <p>11a. Box 3</p> <p>12a. $3 \frac{66}{21}, 3 \frac{20}{35}, 3 \frac{18}{21}, \frac{87}{21}, 4 \frac{15}{35}$</p>	<p>7a. Various answers; for example:</p> $\begin{array}{ c } \hline 28 \\ \hline 6 \\ \hline \end{array} > \begin{array}{ c } \hline 72 \\ \hline 27 \\ \hline \end{array}$ <p>8a. $\frac{80}{25}$ is the mistake because it is equivalent to $3 \frac{1}{5}$ which is less than $3 \frac{2}{5}$.</p> <p>9a. Jason is correct because the numbers are ordered from smallest ($2 \frac{1}{4}$) to largest ($3 \frac{1}{4}$) and his number ($2 \frac{1}{2}$) comes in between the two numbers.</p>
