

New York Through Time

How has New York City Changed through time?

Take a look at NYC Grid website and select **four** places to investigate (you can do more if you have time to). Have a look at the pictures and describe the built environment **then** (the date appears beneath the photographs) and **now** (these photos are usually taken from between 2012-2015).

As you look at the photographs think about the following questions:

- Have the buildings changed, or remained the same?
- What materials have been used?
- Do the people dress differently?
- How has the technology changed, or remained the same?
- Are people using the space in the same way, or differently?

Place (e.g. Mott Street)	Then (e.g. 1967)	Now (e.g. 2013)
